PROFESSIONAL SUMMARY

Aspiring Java and Spring Boot developer pursuing B.E. in Computer and Communication Engineering, with hands-on experience building full-stack web applications, JWT-secured REST APIs.Comfortable designing MySQL-backed systems, building React.js interfaces, and integrating multiple services into one end-to-end workflow. Strong problem-solving mindset and a habit of learning by building. Seeking an entry-level Software Developer role to contribute clean, reliable code while growing as an engineer.

EDUCATION

KS Institute of Technology, Bengaluru, Karnataka — **2023 – 2027**
B.E. – Computer and Communication Engineering (CCE) | **CGPA: 7.2**

RNS Pre-University College, Bengaluru, — **2021 – 2023**
Karnataka PUC | Percentage: 70%

Our English High School, Bengaluru, — **2019 – 2021**
Karnataka 10th Grade | Percentage: 60%

PROJECTS

RecruitAI – AI-Powered Recruitment Platform *(Spring Boot, React.js, MySQL, FastAPI)*

- Built a full-stack recruitment platform with separate **Student** and **Recruiter** roles, secured with **JWT-based authentication** and role-based access control.
- Developed RESTful APIs in **Spring Boot** for recruiter job creation, updating, and deletion, and for student job browsing and applications, backed by a normalized **MySQL** schema.
- Created an **AI resume-analysis service in FastAPI** covering resume data extraction, skill identification, resume scoring, and job matching, integrated with the Spring Boot backend.
- Delivered an end-to-end workflow across React.js, Spring Boot, MySQL, and FastAPI, from job posting to applicant decision.

OmniMesh AI – 2D Sketch to 3D Mesh Reconstruction using ML *(PyTorch, React, FastAPI)*

- Developed an AI-powered web application that reconstructs **3D mesh models from 2D sketches** using deep learning and computer vision.
- Designed a **two-stage AI pipeline** using **ResNet50**, **PyTorch**, and generative AI models for sketch understanding and 3D reconstruction.
- Built a **React + FastAPI** application with real-time 3D visualization in the browser using **Three.js** and **WebXR** for VR viewing.
- Trained and evaluated on multimodal datasets including **TU-Berlin, ShapeNet, Sketchy, and ModelNet**.

TECHNICAL SKILLS

Programming: Java, Python (Intermediate), SQL

Backend: Spring Boot, REST APIs, FastAPI, JWT Authentication

Frontend: React.js, HTML, CSS, JavaScript

Database: MySQL

Tools & Cloud: Git, GitHub, AWS

Core CS: Object-Oriented Programming, Data Structures & Algorithms

CERTIFICATIONS

• Digital Skills: Artificial Intelligence — **Mar 24, 2026**

• Introduction to IoT — **Nov 04, 2025**

LANGUAGES KNOWN

English • Telugu • Kannada • Hindi
