MOHAN KUMAR K S

Software Developer | Java Developer

+91-9035008861 | mohankumarks32@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate who has built two full-stack, AI-integrated platforms end to end — RecruitAI (Spring Boot, React, FastAPI) and OmniMesh AI (deep learning-based 2D-to-3D reconstruction deployed on AWS). Comfortable across the stack: Java and Spring Boot on the backend, React.js on the frontend, MySQL for data, and Python/FastAPI for AI-driven features. Looking for an entry-level Software Developer / Java Developer role to build on that foundation.

EDUCATION

KS Institute of Technology, Raghuvanahalli, Bengaluru, Karnataka *2023 – 2027*

B.E. – Computer and Communication Engineering (CCE) | CGPA: 7.2

RNS Pre-University College, Uttarahalli, Bengaluru, Karnataka *2021 – 2023*

PUC | Percentage: 70%

Our English High School, Banashankari, Bengaluru, Karnataka *2019 – 2021*

10th Grade | Percentage: 60%

PROJECTS

RecruitAI – AI-Powered Recruitment Platform *2026*

Java, Spring Boot, React.js, MySQL, JWT, REST API, FastAPI

- Developed a full-stack recruitment platform with separate Student and Recruiter roles and JWT-based authentication.
- Implemented recruiter job creation, viewing, updating, and deletion, along with student job browsing and applications.
- Built application management with accept/reject status tracking and recruiter applicant management.
- Integrated Spring Boot, MySQL, and React.js to provide an end-to-end recruitment workflow.
- Developed AI-based resume analysis functionality using FastAPI, including resume data extraction, skill identification, resume scoring, and job matching.

OmniMesh AI – 2D Sketch to 3D Mesh Reconstruction using AI/ML with AR & VR *Aug 2025 – Dec 2025*

Python, PyTorch, ResNet50, React, FastAPI, Three.js, WebXR, AWS

- Developed an AI-powered web application for reconstructing 3D mesh models from 2D sketches using deep learning and computer vision.
- Implemented a two-stage AI pipeline using ResNet50, PyTorch, and generative AI models for 3D reconstruction.
- Built a React + FastAPI application with real-time 3D visualization using Three.js and WebXR.
- Deployed the application on AWS with GPU acceleration and implemented model export in OBJ and STL formats.
- Worked with multimodal datasets including TU-Berlin, ShapeNet, Sketchy, and ModelNet.

TECHNICAL SKILLS

Programming: Java, Python (Intermediate)
Backend: Spring Boot, REST APIs, FastAPI, JWT Authentication
Frontend: React.js, HTML, CSS
Database: MySQL, SQL
AI/ML: PyTorch, CNN, ResNet50, OpenCV, ControlNet
3D / Web: Three.js, WebXR
Cloud & Tools: AWS EC2, Git, GitHub

CERTIFICATIONS

- Digital Skills: Artificial Intelligence — Mar 24, 2026
- Introduction to IoT — Nov 04, 2025
